ABOUT ME

I'm a front-end/WordPress Developer and designer, with well-rounded knowledge in UX UI, graphic design, product management and marketing principles. I have about 9 years of experience in the graphic and web design industry and I am specialized in WordPress Development, WooCommerce and have experience building custom WordPress environments.

EXPERIENCE

WordPress Developer and UX UI | C2 TECHNOLOGIES GROUP

JANUARY 2025 – MARCH 2025

Roles and Responsibilities from LOR Technologies remained in place, and only affected the Company Name I worked for.

WordPress Developer and UX UI | LOR TECHNOLOGIES

JUNE 2023 – DECEMBER 2024

- All WordPress projects and clients from MDH Digital moved with me to LOR Technologies, as the business was closed down
- Front-end and WordPress Developer for clients and internal teams.
- Notable clients include C2Group, Crystalfusion, UASA, Tribeca Coffee Company, Pro-Gressio life coaching, Class Signs Signage and Graffiti. Wordpress websites varied from basic sites to extremely custom e-commerce solutions.
- Additionally spent a lot of time using Figma creating wireframes, designs and include UX/UI fundamentals

WordPress and Front-End Developer | MDH DIGITAL

DECEMBER 2022 – JUNE 2023

I joined MDH Digital thanks to a referral from my Previous employer. MDH Digital was an ad agency specializing in the automotive industry and had a vast range of clients and dealerships. My time here was short but learning experience was like no other.

- Front-end Development and WordPress Developer for clients base.
- Notable clients included UASA, Bikewise, Graffiti. Other responsibilities included assisting
- Managing a team of remote front-end developers, giving them tasks and providing feedback on work, ensuring that their work is correct and functional
- General IT support around the office
- General network support for the office.
- Custom login portal and Dashboards using PHP built for UASA

WordPress and Front-End Developer | Hyperbolic

JUNE 2022 – NOVEMBER 2022

I joined Hyperbolic as a Front-end and WordPress Developer, building and maintaining WordPress website they had for their clients. With my design experience I was also able to assist and provide feedback on the designs of systems the other devs were building.

- Front-end Development and WordPress Developer for clients base.
- Notable clients were USN - eCommerce website.
- Advanced custom page building using plugin page builders (mostly with Elementor).
- Using PHP code with API's to display dynamic data from the API within WordPress environments. This was very limited but dynamic nonetheless!
- Other skills i've gained during this time include working with Bubble and NocoDB.
- Understanding how API work and how to create API's that can communicate with a database and have the data interactable from the front end. This also allowed me to learn and understand the fundamental of API Requests and data manipulation
- This also exposed me to SWAGGER documentation and made me understand the benefits and reasons for this kind of breakdown to be documented.

Creative Analyst | eNew Media

MARCH 2021 – MAY 2022

With over 3 years of experience at eNew Media, my job title, roles and responsibilities shifted, as all of our companies' websites moved to WordPress environments.

- WordPress multi environments, for developing, testing and live implementations.
- WordPress multi domains, for curated content and builds per location.
- WordPress website startups using themes and templates from WordPress and plugins.
- Advanced custom page building using plugin page builders (mostly with Elementor).
- Animations and transitions with WordPress plugins, and custom created CSS.
- Interactive elements using custom created infographics in SVG and jQuery.
- WordPress maintenance, updates and optimizations with plugins (YoastSEO, Imagify, WP-Rocket, Google Tag Manager)

Graphic and Web Designer | eNew Media

FEBRUARY 2018 – MARCH 2021

I joined a digital marketing agency for an IT outsourcing company with many divisions, and external clients.

- Graphic Design roles that include, logos, corporate CI's, print and digital advertising (social media), website UI designs and asset creations for websites.
- Main duties included the creation and maintenance of all internal divisions company websites. This responsibility was included for all of our client's online web profiles and maintenance. Some of our clients included Astral Foods, Sabvest and Sabvest Capital. (Client websites had to be updated regularly with News and SENS announcements listed on the JSE), and 10+ internal companies' websites.
- Frameworks I have worked on include HTML, CSS, JavaScript, jQuery, typescript, ASPX web applications, PHP for web building and SMTP contact form submissions.
- Large focus and attention to detail with Responsive design layouts using Bootstrap or custom created solutions with media queries.
- Online web presence setup, maintenance and tracking with Google Analytics, Google Search Console, Google MyBusiness, Woorank, GT-Metrix and more.
- Design UI and fundamentals assistance and implementation, for our in-house development team. (UI Designs, CSS adjustments, functionality implementation on web).
- 2 - Video creation for company brands, posts for social media and reception displays.

IT Assistant | Matrix Warehouse

DECEMBER 2017 – JANUARY 2018

Short term job during my job finding process. General shop assistant and IT Technician:

- Helping with walk-in and over the phone customers.
- In Store general maintenance, packing and shelving products.
IT repairs and maintenance with equipment and general requests from customers.
- IT hardware maintenance, cleaning and fixing.
- IT Software related maintenance, cleaning and fixing.
- Repairs and maintenance on call-outs.

Junior Graphic Designer | Lamda Printing

PART TIME FOR 2016 AND 2017

Part time job as part of my requirements to my Qualification.

- Graphic design tasks that included corporate designs, logos, branding and general assistance in store.
- Print designs that include large scale printing with specialized equipment.
- Labor work in the Print shop, including tasks such as business cards cut-outs, printing and customer assistance, stickers and labeling, vinyl printing and placement for cars, billboards and more.
