

DANIEL VAN DEN BERG

WORDPRESS & FRONT-END DEV

OVERVIEW

Hi im Daniel, a graphic and web designer. My career choices was made the day I picked up a camera to film me and my friends on a skateboard, and create silly videos and edits of our past times. We were young and had fun. I fell in love with digital arts and digital media and knew this would be my future.

As a creative and artist I found that no task is impossible if you do your research, get creative and keep it simple.

My passion and job interests lie in the digital design, web programming and design, and 3D modeling.

I have been working as a web designer and developer for four years, and I've completed multiple website builds and publications for companies and clients including; Enterprise Outsourcing, Secured Enterprise, HR Artis, Financeapps Astralfoods, Sabvest capital and more.

HOBBIES

Photoshop manipulations
Drawing and doodling
3D Modeling
Outdoor Activities
Video and photography
Web design research and trends
Learning new skills

WORK EXPERIENCE

C2 Technologies Group

WordPress and Front-End Developer

January 2025 - March 2025

Roles and Responsibilities from LOR Technologies remained in place, and only affected the Company Name I worked for.

LOR Technologies *Owned by C2Group*

WordPress and Front-End Developer

June 2023 - December 2024 *Germiston, Johannesburg*

All WordPress projects and clients from MDH Digital moved with me to LOR Technologies, as the business was closed down
Front-end and WordPress Developer for clients and internal teams.
Notable clients include C2Group, Crystalfusion, UASA, Tribeca Coffee Company, Pro-Gressio life coaching, Class Signs Signage and Graffiti. Wordpress websites varied from basic sites to extremely custom e-commerce solutions. Additionally spent a lot of time using Figma creating wireframes, designs and include UX/UI fundamentals

MDH Digital *Owned by C2Group*

WordPress and Front-End Developer/Technical Assistant

December 2022 - June 2023 *Germiston, Johannesburg*

Front-end Development and WordPress Developer for clients base. Notable clients included UASA, Bikewise, Graffiti. Other responsibilities included assisting and managing other front-end developers and general IT support around the office.

Hyperbolic

WordPress and Front-End Developer

June 2022 - November 2022 *Fully Remote*

Front-end Development and WordPress Developer for clients base. Notable clients were USN - eCommerce website. Other skills I've gained during this time include working with Bubble and NocoDB.

eNew Media

WordPress & Web Designer

February 2018 - May 2022 *Sandton, Johannesburg*

Building and maintaining company web pages and outsourcing clients' webpage creation and maintenance.
Website creation includes, strategy and planning, wireframe construction, designing and building according to design in web languages including HTML, CSS, and JS, PHP, Wordpress, etc.
Ad creation for marketing purposes on company social media pages.
Graphic designs including brochures, logos, packaging, creation for companies CI's, website designs, social media ads and design principles throughout.
